

BCIT Course: CESA 1005 - Zero Energy Buildings All-In-One: Fundamentals, Airtightness, Assemblies

Published 17-Apr-20 by [Bonnie Van Tassel](#)

Cost: \$100

Date: April 21 - June 25, 2020

Format: Online

This course provides a comprehensive study of Zero Energy Buildings (ZEBs) to ensure that that builders, designers, consultants and tradespeople have the knowledge to build to the BC Energy Step Code, Net-Zero Energy or the Passive House standard.

Students will learn from industry experts and develop an understanding of building science in ZEBs, airtight design and construction, execution of high-performance assembly details, and mechanical systems for ZEBs.

Our FNHES program is able to cover the registration cost if needed. Please email sfralin@fraserbasin.bc.ca to request a subsidy, or contact [Sara Fralin](#) here on the ICE Network for more information.
