

Solar Trainer Required

Published 30-Apr-20 by [Cara Sanders](#)

Hello Catalyst 20/20 network

I am looking for an Indigenous PV Installation & Training company or someone along those lines that is interested in delivering an off-grid solar PV installation workshop in the remotes in Northern Ontario.

We are thinking a two or three day intensive training program that focuses on small scale off-grid solar for camps and cabins. Grid-connected applications could also be considered.

COVID dependent dates are likely late 2020.
