

ICE Network Update

Published 01-Feb-21 by [Shelby Heaney](#)

Hello ICE Network Members,

We are always working to make your ICE Network experience more meaningful and user-friendly. This year, we have an exciting line up of new content and improvements coming your way.

To start, we are changing the way joining a Forum works. Joining a Forum is critical to engaging on topic and staying up to date with what's going on in the Forum. Currently, you need to manually join each space you're interested in. We've heard and seen that this extra step can be a barrier for people getting started on the platform.

So, we're changing how things work.

On Monday, February 8th, 2021, we will be automatically making all ICE Network members (current and future) a part of all public Forums. This means, you'll all start seeing content in your newsfeed and daily/weekly digests from the following forums:

- [Bioenergy](#)
- [Community Energy Planning](#)
- [Energy Efficiency](#)
- [Project Development and Diesel Reduction](#)
- [Help & How-to](#)
- [IHII Circle](#)
- [TIE exchange](#)

If you only want to be in specific Forums, don't worry, you can always leave the Forums you're not interested in by following these steps:

1. Select the Forum you want to leave.
