## Welcome to the Indigenous Clean Energy (ICE) Network's collaborative platform!

We're glad you've joined us to help advance clean energy in a way that supports Indigenous leadership, rights, and values.

The ICE Network provides a common ground for people like yourself to collaborate, and share learnings and ideas about projects and policies. The Network is organized around a set of Action Forums that focus on specific topics relevant to Indigenous clean energy efforts. Our current Forums include:

- [Off-Grid Diesel Reduction](#)
- [Energy Efficiency](#)
- [Community Energy Planning](#), and
- [BioEnergy](#)

We also have this [Help and How-To](#) Forum which is simply here to provide technical support for using the platform. If you have any questions, you can just post them to the wall of the forum or create a "case" if you have a more specific question you need support on.

You can [browse all our Forums here](#).

The collaborative nature of the Network means that we are always looking for members to take leadership on Action Forums. If any of these Forums sound like areas you would like to play an active role in, send a message to the Network Curator, [Ian Scholten](#). Likewise, if there is a Forum topic that you think should be covered but isn't listed here, send your suggestion to [Ian Scholten](#).

### A note about collaboration

The success of this Network depends on the active participation of members like you. Nothing can happen if we all sit silent. So don't be afraid to like and comment on posts, submit your ideas, write up articles about your work, share videos, and more. These sorts of actions help the Network come alive and enable people to start to see connections between activities, learn new things, and unlock new opportunities.

This is how we'll create the change we are all working towards.

## Keep Reading

To help you get the most out of the Network, be sure to read the rest of the "getting started" material by clicking the menu items to the right.
